Alice,

I believe I was the one that mentioned this at a meeting. If you google crab hepatopancreas sauce recipes, you will be amazed at the amount of recipes out there. One person spreads the crab mustard on bread and eats it along side the crabs. Take a look at the various sites, and you'll see that hepatopancreas is considered delicious by many, despite the knowledge that this organ is unhealthy.

Linda

May I forward these reports to the Potentially Responsible Parties on the Passaic River? Or alternatively, are these reports available publicly on NJDEP's web site (if so, what page?)?

Also, when we met in Trenton to discuss these issues, you mentioned that you had found recipes on line that use hepatopancreas only for sauces - could you tell me where you found those recipes? The PRPs are asking for copies.

Recreationally caught Blue Crab Studies

Hello Marian,

I am sending you the Final reports (Yrs 1-3) for the Blue Crab studies we conducted at DEP. This will have data on recreationally caught blue crabs for delaware bay region, & the atlantic coastal region up to Monmouth County.

Please let me know if you have any questions,

Lynette
